

Chatteris Educational Foundation & Nord Anglia University

Professional Learning Collaboration Webinars

Introduction

Chatteris Educational Foundation is the only educational charity that connects international graduates, local schools, and community partners to best impact students in Hong Kong. With our team of 100 tutors from across the globe we partner with schools to develop an authentic English environment for their students; support a range of community outreach projects; and develop our tutors with educational, professional, and NGO experience. Facing this challenging period of time, there have been lots of waves in education. Educators have had to join hands together to move forward. We are very glad to collaborate with Nord Anglia University (Asia) to create a community with teachers and educators to share thoughts and knowledge regarding education throughout the year.

Nord Anglia International School is a through-school based over 3 campuses in Hong Kong and part of the Nord Anglia Education group of 68 schools across the world. We believe in the value of free high-quality professional development for teachers. To achieve this, our professional development platform, Nord Anglia University (Asia), creates learning events and opportunities for educators from all sectors to collaborate, share ideas, research, practice and resources together in a learning community.

We hope to host webinars that provide opportunities for educators from all sectors to learn together building on the professional development programme.

Topic: Assessment Methods
